About Company

GenPro Energy Development is a leading solar energy developer specializing in distributed generation solutions for the Midwest region. As a spin-off from GenPro Energy Solutions, we leverage over two decades of experience in developing high-quality, cost-effective solar projects tailored to the unique needs of public power entities, municipalities, tribes, and state governments.

Our Mission

To build independent communities empowered by our creative energy solutions.

Vision

At GenPro Energy Development, we imagine a future where distributed generation solutions serve as the foundation for economic growth and community empowerment.

Our Values

Community Focus

We prioritize the needs and aspirations of the communities we serve, ensuring our projects contribute positively to local economies and environments.

Innovation

We embrace cutting-edge technologies and creative solutions to address the unique challenges of the renewable energy landscape, ensuring our projects are not only effective but also forward-thinking.

Creating Value

We deliver tangible benefits to our stakeholders, including financial returns for investors and sustainable energy solutions for communities, fostering long-term partnerships and growth.

Our Goals

GenPro Energy Development is committed to advancing renewable energy solutions that benefit our communities and stakeholders. Our goals are centered around the following key objectives:

01

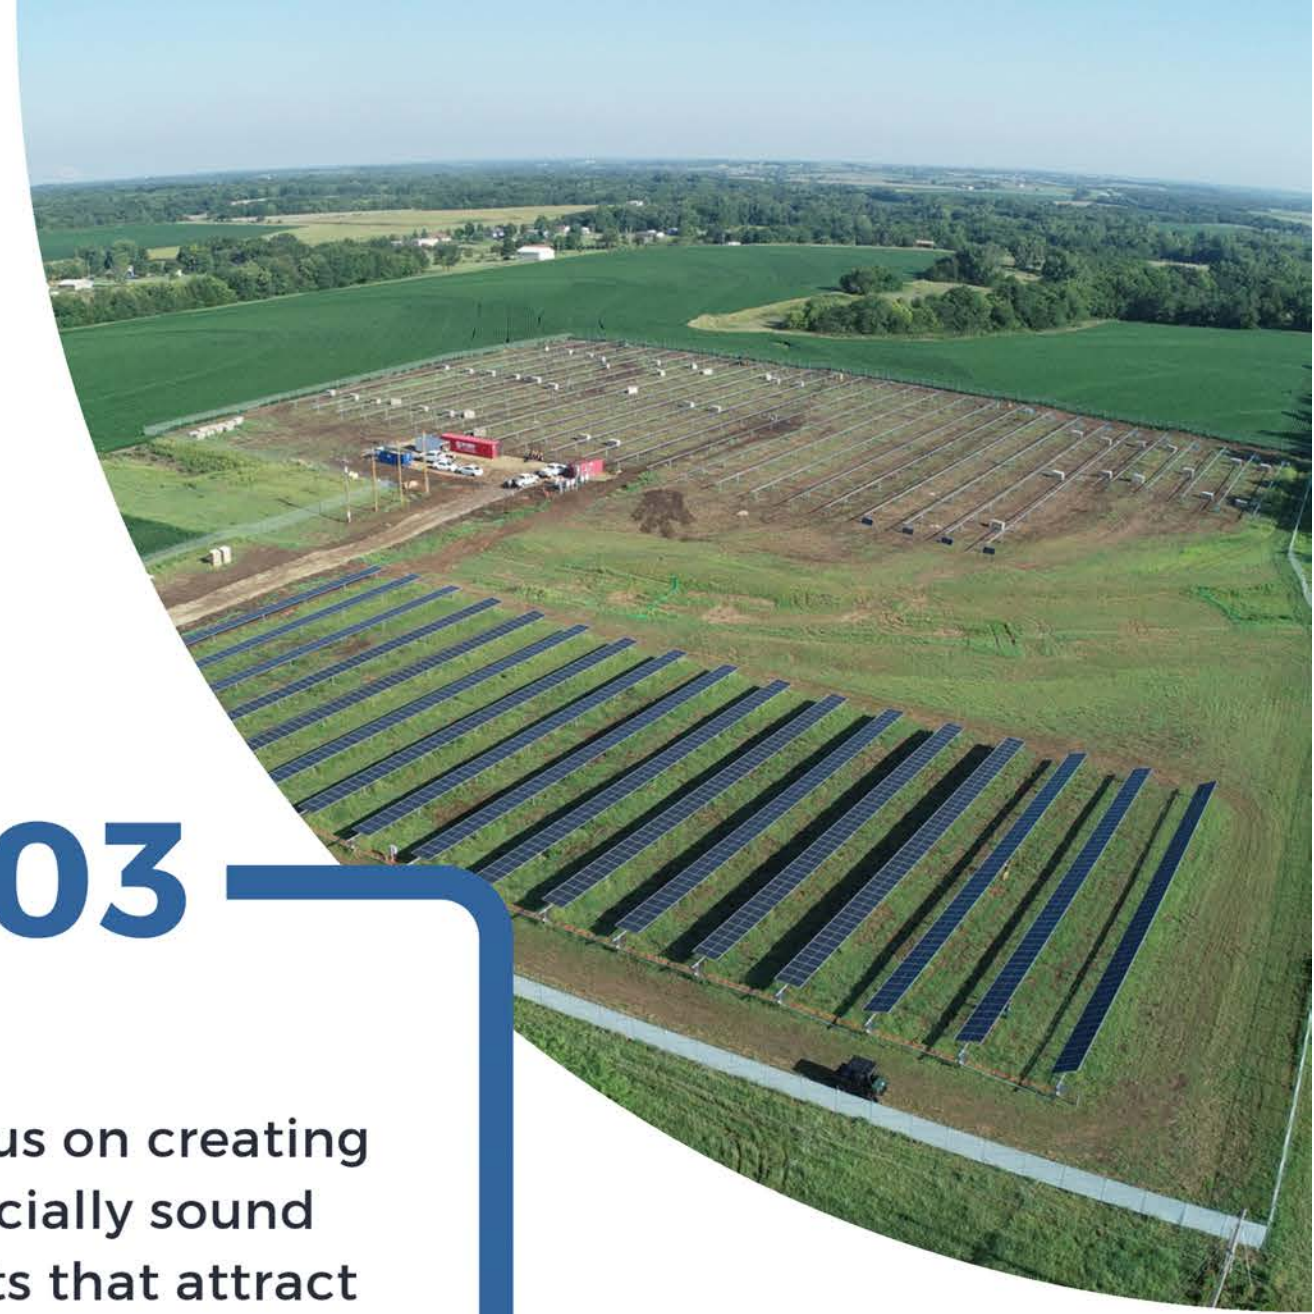

We aim to increase the adoption of solar energy and other renewable technologies across the Midwest, particularly in underserved markets.

02

We strive to engage with local communities to understand their unique energy needs and challenges.

03

We focus on creating financially sound projects that attract investment and provide long-term returns.

Who We Serve

Municipalities

We collaborate with city governments to develop community solar projects benefiting local residents and businesses. Our tailored solutions aim to meet community needs, reduce carbon footprint, and drive economic growth through renewable energy.

Tribes & State Government

GenPro Energy Development aids tribal communities and state governments in achieving energy sovereignty and sustainability goals with culturally respectful solar projects, supporting energy targets, economic growth, and environmental stewardship.

Public Power Entities

We work with public power utilities to create solar projects that boost energy independence, cut costs, and deliver reliable renewable energy to customers. Our expertise helps utilities implement solar solutions in line with their objectives.

GENPRO ENERGY
DEVELOPMENT

GenPro Energy Development combines deep regional knowledge, innovative financial solutions, and technical expertise to deliver solar projects that make financial sense for investors and create lasting value for communities. Our commitment to community focus, innovation, and creating value ensures that we not only meet the energy needs of today but also contribute to a sustainable and prosperous future for all stakeholders involved.
